Surface Area of Composite Figures Tutorial | Sophia Learning

The surface area of a cylinder is easy to work out because its surface is actually a composite of regular plane shapes. There are two identical circles - one for the top, and one for the bottom of the cylinder. There's also a rectangle, which is the shape you get when you unwrap the curved surface and lay it flat:

Surface Areas of Composite Solid Shapes - Math-Mate

Area of composite shape = $706.9 - 16 = 690.9 \text{ m}^2$. So this is the area of grass section of the garden. So if you are finding areas of composite shapes then you just need to break up the shape into smaller shapes. Once these are found you either add or subtract these areas to give the area of the whole composite shape.

How To Calculate The Area Of A Composite Or Compound Shape ...

Composite shapes are shapes that have a combination of 2-D shapes. To find the area of composite shapes you just need to break down the shape into individual pieces and calculate their separate pieces then add them back together again to find a total area.
