topology on X so that $\tilde{\gamma}$ is continuous, viz, $U \cap X = \tilde{\gamma}^{-1}(U)$ is open if U is open. The resulting topological space is called the quotient space. E.g. Let $I = [0;1] \times \mathbb{R}$ and $X = I/I$. We put the weakest equivalence relation on X s.t. $(0;x) \sim (1;x);(x;0) \sim (x;1)$ for $x \in I$. We sometimes sum up this info in the following picture:

Since this is a textbook on algebraic topology, details involving point-set topology are often treated lightly or skipped entirely in the body of the text. Not included in this book is the important but somewhat more sophisticated topic of spectral sequences.

MTH 869 Algebraic Topology Joshua Ruiter February 12, 2018 Proposition 0.1 (Exercise 1.1.10). Let $(X; x_0)$ and $(Y; y_0)$ be pointed, path-connected spaces. Let $f: I \rightarrow X$ and $g: I \rightarrow Y$ both be loops based at $(x_0; y_0)$. Via inclusions, we can think of f, g as loops in $X \times Y$ based at $(x_0; y_0)$. Let $p_X: X \times Y \rightarrow X$ and $p_Y: X \times Y \rightarrow Y$ be the standard projections. Then we have fg' via the homotopy

This book is designed to introduce a student to some of the important ideas of algebraic topology by emphasizing the relations of these ideas with other areas of mathematics. Rather than choosing one point of view of modern topology (homotopy theory, simplicial complexes, singular theory, axiomatic homology, differential topology, etc ...

Course Goals First and foremost, this course is an excursion into the realm of algebraic topology. Please take a few hours to review point-set topology; for the most part, chapters 1-5 of Lee (or 4-7 of Sieradski or 2-3 of Munkres or 3-6 of Kahn), contain the prerequisite information. Be sure you understand quotient and adjunction spaces.

Define $H: (R^n - \{0\}) \times I \rightarrow R^n - \{0\}$ by $H(x, t) = (1-t)x + t|x|x$, $x \in R^n - \{0\}$, $t \in I$. It is easily verified that H is a homotopy between the identity map and a retraction onto S^{n-1} , i.e. a deformation retraction. Ex. 0.3.
