Design consists of (1) walls stability checks similar to that for gravity walls, assuming the gabions and the reinforced soil act together as one unit, and (2) checks for strength and pullout resistance of the reinforcement layers, to ensure such action. The considerations that differ from gravity wall design are discussed below.

GABION WALLS DESIGN - C.E. Shepherd

All free standing walls are structures and should be adequately designed, constructed and maintained. unfortunately all too often they are seen merely as landscape items and left to the bricklayer to decide how they are built. I recently prepared a report following the collapse of new wall being built on major developers site.
