The Natural History is a work by Pliny the Elder. It is one of the largest single works to have survived from the Roman Empire to the modern day and purports to cover all ancient knowledge. The work's subject area is thus not limited to what is today understood by natural history; Pliny himself defines his scope as "the natural world, or life". It is encyclopedic in scope, but its structure is not like that of a modern encyclopedia. It is the only work by Pliny to have survived, and the last tha

Throughout human history, cats have always lived and thrived outside. It is only recently that we have begun to introduce reproduction control like spaying and neutering to bring them indoors. And also, bring the outdoors to them: using canned food and litter boxes to satisfy biological needs developed over thousands of years of living outdoors.

Natural history is a domain of inquiry
involving organisms, including animals,
fungi, and plants, in their natural
environment, leaning more towards
observational than experimental
methods of study. A person who studies
natural history is called a naturalist or
natural historian. Natural history
encompasses scientific research but is
not limited to it. It involves the
systematic study of any category of
natural objects or organisms. So while it
dates from studies in the ancient Greco-
Roman world

Information. 'The Natural History of German Life' is a review by George Eliot of two books by the German writer W H Riehl. However, the first section of the review does not mention Riehl's works. Instead, Eliot writes about the morality of artistic representation, offering a manifesto for realism. The review appeared in the Westminster Review in July 1856.
