1G refers to the first generation of wireless cellular technology. These are the analog telecommunications standards that were introduced in the 1980s and continued until being replaced by 2G digital telecommunications. The main difference between the two mobile cellular systems, is that the radio signals used by 1G networks are analog, while 2G networks are digital. Although both systems use digital signaling to connect the radio towers to the rest of the telephone system, the voice itself duri
