To begin, it is advisable to get a basic electronics kit which includes resistors,

capacitors, diodes, and LEDs (amongst other things). There are no hobby kits which are perfect. They will always be missing that one last thing you need. However, the one I linked to includes a little bit of everything, and is a good place to start.

Electronics Class - Getting Started With Electronics ...

3. Teach some basic concepts of electronics with examples. When your kids have played around a little bit with electronics, they're going to get curious and start asking "why" questions. When that time comes, it's time to teach your kids some of the basic concepts of electronics. Here are some things I like to start with:

How to teach electronics to beginners | Opensource.com

July 23, 2014 By Øyvind Nydal Dahl 6 Comments. It's not that hard to get started in electronics as a hobby, you know. For some reason, some people like to tell beginners that it's hard. They tell you that "You have to go to university to make electronics". And you see those crazy schematics with lots of strange components, so you start believing that it really is hard.
