Where Do Babies Come From?

Our First Talk About Birth *Orca Book Publishers*

An engaging introduction for very young children to the basic facts of life in a way that is gentle, age-appropriate and accessible. Child psychologist Dr. Jillian Roberts created the Just Enough series to help parents and caregivers approach difficult subjects with little ones. These primers offer a gentle and accessible starting point for conversations about important topics. Research shows that children are learning about sex at an increasingly young age and often from undesirable sources. The Q&A format, with questions posed in the child’s voice and answers starting simply and becoming gradually more in-depth, allows the adult to guide the conversation to a natural and satisfying conclusion. Additional questions at the back of the book allow for further discussion. Where Do Babies Come From? is the first book in the Just Enough series. Other topics in the series include death, cultural diversity and separation or divorce.

The Seeds of Life**From Aristotle to da Vinci, from Sharks' Teeth to Frogs' Pants, the Long and Strange Quest to Discover Where Babies Come From** *Basic Books*

Why cracking the code of human conception took centuries of wild theories, misogynist blunders, and ludicrous mistakes Throughout most of human history, babies were surprises. People knew the basics: men and women had sex, and sometimes babies followed. But beyond that the origins of life were a colossal mystery. The Seeds of Life is the remarkable and rollicking story of how a series of blundering geniuses and brilliant amateurs struggled for two centuries to discover where, exactly, babies come from. Taking a page from investigative thrillers, acclaimed science writer Edward Dolnick looks to these early scientists as if they were detectives hot on the trail of a bedeviling and urgent mystery. These strange searchers included an Italian surgeon using shark teeth to prove that female reproductive organs were not 'failed' male genitalia, and a Catholic priest who designed ingenious miniature pants to prove that frogs required semen to fertilize their eggs. A witty and rousing history of science, The Seeds of Life presents our greatest scientists struggling-against their perceptions, their religious beliefs, and their deep-seated prejudices-to uncover how and where we come from.

The Violinist's Thumb

And Other Lost Tales of Love, War, and Genius, as Written by Our Genetic Code *Little, Brown*

From New York Times bestselling author Sam Kean comes incredible stories of science, history, language, and music, as told by our own DNA. In The Disappearing Spoon, bestselling author Sam Kean unlocked the mysteries of the periodic table. In THE VIOLINIST'S THUMB, he explores the wonders of the magical building block of life: DNA. There are genes to explain crazy cat ladies, why other people have no fingerprints, and why some people survive nuclear bombs. Genes illuminate everything from JFK's bronze skin (it wasn't a tan) to Einstein's genius. They prove that Neanderthals and humans bred thousands of years more recently than any of us would feel comfortable thinking. They can even allow some people, because of the exceptional flexibility of their thumbs and fingers, to become truly singular violinists. Kean's vibrant storytelling once again makes science entertaining, explaining human history and whimsy while showing how DNA will influence our species' future.

Under Our Clothes Read-Along

Our First Talk About Our Bodies *Orca Book Publishers*

This illustrated nonfiction picture book by child psychologist Dr. Jillian Roberts introduces children to the topics of bodies, body safety and body image through a conversation-based story that begins with an observation at the community pool. Modesty, privacy and boundaries are discussed, along with how self-image is formed and how some people are more sensitive than others—sometimes at different stages in their lives. Relevant themes around body shaming, body positivity and self-

esteem building are explored, with a final call to action empowering children to build their own confidence and speak up when something doesn't feel right. The World Around Us series introduces children to complex cultural, social and environmental issues that they may encounter outside the comfort of their homes, in a way that is straightforward and accessible. Sidebars offer further reading for older children who have bigger questions or care providers looking for more information. For younger children, the simple question-and-answer format of the main text will provide a foundation of knowledge on the subject matter. This is the newest title in The World Around Us series, following books that address poverty, tragedy, prejudice and online awareness and environmental stewardship.
