Ecological Succession Worksheet Answer Key | Mychaume.com

Primary ecological succession is the changing sequence of communities starting with the first biological

occupation of a place where there were no living organisms previously. For example, the colonization and the following succession of communities on a bare rock is a case of primary ecological succession. Secondary ecological succession is the changing sequence of communities starting with the substitution of a community by a new one in a given place.

Ecological Succession - Biology Q&As

During ecological succession, a grass community is replaced by a community of shrubs. This change is primarily a result of the fact that the grass community –. answer choices. evolves over several decades into a new species bushes that dominates the ecosystem.
