KS3 Water Cycle - Metlink | Weather & Climate Teaching ...

The hydrological cycle is also known as the water cycle. Seas and oceans contain 97% of the world's water, and ice holds 2%. That leaves just 1% of the world's water as fresh water on land or in...

The hydrological cycle - The water cycle and river ...

The water cycle is expected to intensify in a warmer climate, because warmer air can be moister: the atmosphere can hold about 7% more water vapour for each degree Celsius of warming. Observations since the 1970s show increases in surface and lower atmospheric water vapour (Figure 1a), at a rate consistent with observed warming.
