Honda engines are designed for good performance and efficient operation using gasoline containing from 0 to 10% ethanol. E85 is an alternative fuel. It is not gasoline. It is made by combining 85% ethanol with 15% gasoline.

Honda Engines | Fuel Recommendations

As fuel is consumed by the engine, the level in the fuel tank lowers. To make up for this, the fuel cap uses a small vent to allow air to enter the tank. If the fuel cap vent is clogged, air won't be able to enter the tank and a vacuum or "vapor lock" will occur. This stops the flow of fuel to the carburetor causing the engine to stall.
