Brain Culture And The Human

Humans are biologically adapted to cultural environments they themselves create. Human brain and mind are therefore modified, shaped, and formed through one’s active engagement in a variety of sociocultural contexts. Understanding the interplay between culture and human brain function and between culture and human behaviour is a necessary step for uncovering both the mechanisms underlying cultural processes and behaviour and human brain responses to evolutionary/societal demands.

Culture and Brain | Home

Our brains probably became modern before our culture. For 200,000-300,000 years after Homo sapiens first appeared, tools and artefacts remained surprisingly simple, little better than Neanderthal technology and simpler than those of modern hunter-gatherers such as certain indigenous Americans.

Human Brain-Society & Culture - Imphal Times

Both the structure and function of the human brain throughout its development are shaped by the environment. The social environment, in turn, is shaped by culture. The emerging field of cultural neuroscience examines how the interplay and mutual constitution between neural and cultural forces gives rise to different patterns of behavior, perception, and cognition.
