In physics,
Kaluza-Klein theory (KK
theory) is a classical
unified field theory of
gravitation and
electromagnetism built
around the idea of a
fifth dimension beyond
the usual four of space
and time and
considered an
important precursor to

Nordström had an
earlier, similar idea.
But in that case, a fifth
component was added
to the electromagnetic

vector potential, representing the Newtonian gravitational potential, and writing the Maxwell equations in 5 dimensions.

Kaluza-Klein theory - Wikipedia

The original Kaluza-Klein theory was one of the first attempts to create a unified field theory i.e. the theory, which would unify all the forces under one fundamental law. It was published in 1921 by German mathematician and physicist Theodor Kaluza and extended in 1926 by Oskar Klein.

KALUZA-KLEIN THEORY - University of Ljubljana

But at around the same time the German mathematician Theodor Kaluza and

the Swedish physicist Oskar Klein began to wonder if there were more than three spatial dimensions. General relativity, which was Einstein's big idea, said that dimensions could be curved. This sounds strange at first but we are used to that as well.

Kaluza-Klein Reduction on S^1 and T^n - dimensional T string theory and n -dimensional elev M-theory are at present our best candidates for providing a unified description of all the fundamental forces in nature. Kaluza-Klein theory is developed starting from the simplest example in which a single extra spatial dimension is compactified to a circle, and a single Abelian gauge field emerges in four dimensions from the higher-dimensional metric.

KALUZA-KLEIN THEORIES - INSPIRE

Five-dimensional Kaluza-Klein theory (Kaluza 1921, Klein 1926) unifies electromagnetism with gravitation by starting from a theory of Einstein gravity in five dimensions. Thus, the initial theory has

five-dimensional general coordinate invariance.

Kaluza-Klein theories - Brown University

What is today known as the 'Kaluza-Klein theory' was developed in the 1920s by the efforts of Theodor Kaluza and Oskar Klein to unify electromagnetism and gravity in a five-dimensional Riemannian spacetime by invoking an extra spacelike dimension.

We develop a new mechanism for the accumulation of conserved numbers in the early Universe in Kaluza-Klein-like

theories. The relaxation of the primordial extra space perturbations existing in the early Universe leads to the establishment of a symmetric final state and the appearance of Killing vectors. As a result, the initial non-zero value of symmetry associated numbers occurs after the ...

Kaluza-Klein Theory, the ancestor of unifying theories like string theory, predicts that electromagnetism comes from the shape of five-dimensional spacetime

Stuff From Shape --- Kaluza-Klein Theory

The primary assumption of the

original Kaluza-Klein theory (other than a fifth dimension actually exists) is the independence of all vector and tensor quantities with respect to the fifth coordinate. This assumption is due to Kaluza, who needed to make a more straightforward connection of his theory to the gauge transformation
