Construction Delay Forensic Schedule Analysis

Forensic schedule delay analysis is the study and investigation of events using CPM scheduling methods to establish the cause and extent of delays and to resolve construction delay claims through negotiations or legal proceedings. It is a field for experts trained and experienced in CPM scheduling.

Methods of Forensic Schedule Delay Analysis - Pros and ...

Forensic schedule delay analysis is the investigation of tasks and the activities by using CPM scheduling methods to model the real project situation to resolve delay claims through negotiations or

legal processes.

Although there are several approaches for performing construction schedule delay analysis, there is no standard method.

Forensic Schedule Delay Analysis Methods -

projectcubicle

Forensic schedule delay analysis is not important just in claims on completed projects, but just as important to resolve delays that have been absorbed into the schedule during the project. If you think of this as similar to costs, an Owner would rarely allow a Contractor to provide an estimate or a guess about a time & material change order.

Forensic Schedule Delay Analysis Training: Getting the

...

Schedule delay analysis is described as the research and analysis of an event, performed with the goal to identify the reason for a project delay. Common in the construction industry, delay analysis is used to identify delays and resolve claims or disputes. In order to successfully perform such analysis, knowledge of CPM and scheduling, combined with the knowledge of different methods of delay analysis may be required.

Top 10 Courses to Learn Forensic Schedule Delay Analysis

Hence determining the contractual responsibility of delay is the most likely source of dispute in

construction projects for transportation infrastructure. Methods used for forensic investigation of delay are called as 'forensic schedule delay analysis methods'.

Construction Schedule Delay Analysis - projectcubicle

Delay Analysis - Decipher Consulting | Construction ...

The goal of the schedule analysis will be to identify the specific activity delays that resulted in the

overall eight-week delay to project completion. Including the as-built schedule, there were six updates to the baseline schedule. The updates were completed after every four weeks of work.

Forensic Schedule Analysis: Example Implementation

A forensic delay analysis should at least produce the following: Identification of activities that actually caused delay to the critical path; and Quantification of critical delay caused by each activity. In theory, the “actual” amount of critical delay caused by an activity should be an objective endeavor.

Forensic Delay Analysis: Modeled or Planned v. As-built
