 20,000 BC, the peak of the last ice age—the atmosphere is heavy with dust, deserts, and glaciers span vast regions, and people, if they survive at all, exist in small, mobile groups, facing the threat of extinction. But these people live on the brink of seismic change—10,000 years of climate shifts culminating in abrupt global warming that will usher in a fundamentally changed human world.

After the Ice — Steven Mithen | Harvard University Press

The other clever, and poignant, aspect of this book is that Mithen explores how studying the abrupt transition between the ice age and a period of global warming could provide clues to the effects of climate changes going on today. Nina Jablonski states that 'by the end of this rich and multilayered book, I was dazzled and hungry for more.
