More complex networks, and increased needs for cyber security defences demand increased levels of change and audibility. CGI's Next Generation of network monitoring and management provides a solution. For organisations, the increasing complexity of data

security behind company firewalls is more complex and provides a real challenge.

Next Generation Networks | CGI UK

The next-generation network is a body of key architectural changes in telecommunication core and access networks. The general idea behind the NGN is that one network transports all information and services by encapsulating these into IP packets, similar to those used on the Internet. NGNs are commonly built around the Internet Protocol, and therefore the term all IP is also sometimes used to describe the transformation of formerly telephone-centric networks toward NGN. NGN is a different concept
