...

Environmental psychology is the study of human behavior and well-being in relation to the large-scale, sociophysical environment. The term, large-scale environment, refers to places such as homes, offices, neighborhoods, and whole communities. These places can be described in terms of several physical and social dimensions, including their geographical location, architectural design, membership and social organization.

Environmental Psychology - Free Course by UC Irvine on

...

If you opt for a major in an environmental discipline instead, then ensure you choose psychology and philosophy based short courses. Environmental Psychology can also concern itself with interior building design, so a further option would be to take a relevant architecture or interior design degree, and then take a psychology minor and focus your project work on Environmental Psychology.
