Genome The Graphic Novelscience Fiction ...

Ten percent of our genome is made up of ancient viruses, and at least another 60 percent consists of repeated elements made by jumping genes gone wild. Only 2 percent is made up of our own genes. With cells and genetic material of different species merging and genes continually duplicating and repurposing, life’s history flows more like a braided and meandering river than a straight channel.”

As a longtime fan of serious graphic storytelling, and an aspiring writer of a graphic novel script, I picked this up to learn the nuts and bolts of how long-form graphic stories are put together. The book is a great "how-to" concept -- the idea is that you read Rollins' 100-page sci-fi graphic novel "The Resonator", and then you flip the book and read about how he created it.
