The Court Cities of Northern Italy

Milan, Parma, Piacenza, Mantua, Ferrara, Bologna, Urbino, Pesaro, and Rimini *Cambridge University Press*

This volume examines the painting, sculpture, decorative arts, and architecture produced in nine important court cities of Italy during the course of the fourteenth, fifteenth, and sixteenth centuries. Although each chapter represents a separate study of a particular geographical locale, many common themes emerge. This volume gives a multifaceted consideration of the art created for princes, prelates, confraternities, and civic authorities – works displayed in public squares, private palaces, churches, and town halls. Including six essays specially commissioned that explore the interaction of artists and their civic and/or courtly patrons within the context of prevailing cultural, political, and religious circumstances, The Court Cities of Northern Italy provides a rich supplement to traditional accounts of the artistic heritage of the Italian Renaissance, which has traditionally focused on the Florentine, Venetian, and Roman traditions. The book includes 35 color plates and 221 black and white illustrations.

Atlante di anatomia umana e chirurgia

È grande il nostro debito nei confronti di Jean Baptiste Marc Bourger y (1797-1849) per il suo Traité complet de l& anatomie de l& homme, che non solo ha costituito una pietra miliare importantissima nella storia della medicina, ma rimane uno dei trattati anatomici illustrati più ampi e belli mai

pubblicati. Bourgery iniziò a lavorare sul suo magnifico atlante nel 1830 insieme all'illustratore Nicolas Henri Jacob (1782-1871), allievo del pittore francese Jacques Louis David. I primi volumi furono pubblicati l'anno successivo, ma ci vollero quasi vent'anni per completare l'intera opera; Bourgery visse abbastanza a lungo per portare a termine la sua appassionante fatica, ma l'ultimo volume, l'ottavo, fu pubblicato cinque anni dopo la sua morte. Le quattro parti in cui si articola il trattato di Bourgery si occupano di anatomia descrittiva, tecnica e anatomia chirurgica, anatomia generale, embriologia e anatomia microscopica. Le litografie a grandezza naturale di Jacob dipinte a mano spiccano per la loro chiarezza, il colore e la piacevolezza estetica, riflettendo una combinazione di osservazione scientifica diretta in laboratorio e bellezza dell'illustrazione. Queste immagini offrono un'eccezionale prospettiva sull'anatomia, non solo per chi lavora in ambito medico ma anche per artisti, studenti e chiunque si interessi del funzionamento e delle meraviglie del corpo umano.
