Techopedia explains Web Authoring. With web authoring tools, the end user can see a visual result that is a lot like the final project after it is built. Web authoring tools are similar to HTML editors in that they typically allow toggling between an HTML code view and a visual design. Some of these types of tools are also called WYSIWYG ("what you see is what you get") editors because, again, they allow displaying something that looks like the final project as the user is building it.
