Based on the number of carbon atoms, we can classify fatty acids by their length: short-chain, medium-chain, or long-chain. Short-chains are fewer than 6 carbons, medium-chains are 6-12 carbons, and long-chains are greater than 12 carbons. Short, medium and long-chain fatty acids all deserve attention. Medium-chain fatty acids have become mainstream in the last five years with the popularization of MCT (medium-chain triglycerides).

Chainsets explained. A chainset is part of the drivetrain on a bike. It connects via the chain (or belt in some cases) to the drive wheel of the bike. The chainset rotates using the bottom bracket as a support and housing. When the chainset travels in a clockwise direction, this provides the power to move the bike forwards.
