Construction Of A System Of

Construction systems are the ways in which materials are combined to construct the elements of a building. They can be classified according to the mass of the system into heavyweight and lightweight construction. For example, New Zealand houses typically use lightweight construction systems comprising timber framing combined with building underlay, insulation and internal and external cladding materials for the walls and roofs.

What are construction systems in building terms?

The open panel system is made from treated softwood timber framing, over which a structural sheet material of either Ply or OSB board is fixed. Depending on the system, U-values ranging from 0.26 down to 0.15 W/m²K, can be achieved. Closed-Panel Are made

from studs, rails and insulation, with sheathings and/or linings on the faces of the panel.
