Lesson 7: Divide with Fractions - Ready Common Core

Essentially, division asks “how many”. It’s important to verbalize that no matter what units we have (as long as they are same units), the answer is still the same. Therefore, when working with division of fractions, we can utilize common denominators to get our same units and be able to divide just the numerators. (SMP 7).

Dividing whole numbers by fractions. Interpret and compute quotients of fractions, and solve word problems involving division of fractions by fractions, e.g., by using visual fraction models and equations to represent the problem. For example, create a story context for $(2/3) \div (3/4)$ and use a visual fraction model to show the quotient; use the relationship between multiplication and division to explain that $(2/3) \div (3/4) = 8/9$ because $3/4$ of $8/9$ is $2/3$.
